Projects

RAG-Based AI Teaching Assistant | GitHub Jan. 2026 – Jul. 2026

- Built a **Retrieval-Augmented Generation (RAG)** pipeline in Python using embeddings, **FAISS** vector search, Hugging Face Transformers, and LLMs for context-aware academic question answering.
- Integrated **Whisper** speech-to-text with semantic retrieval and LLM response generation, using retrieval optimization and prompt engineering to improve answer relevance.
- Developed a **Gradio** interface and deployed the application on **Hugging Face Spaces** to support text- and voice-based question answering.

Insta Manager Bot – Instagram Automation Tool | GitHub Apr. 2025 – Dec. 2025

- Developed a **Flask**-based automation platform for Instagram profile monitoring, engagement analytics, and account insights.
- Implemented **SQLite**-backed data persistence for storing and managing collected account information.
- Designed an analytics dashboard to visualize engagement metrics and simplify account monitoring.

ClassMate AI – Smart Attendance & Classroom Management | GitHub | Live Demo Oct. 2026

- Developed an AI-powered classroom management application using **Python** and **Streamlit**, with dedicated teacher and student portals.
- Integrated a **face-recognition-based attendance workflow** to support automated attendance management.
- Used **Supabase** for backend data management and integrated supporting Python libraries for application functionality.
- Deployed the application on **Streamlit Community Cloud**, making the project accessible through a live web interface.

Technical Skills

Languages: Python, C++, JavaScript, SQL, NoSQL

Machine Learning: Scikit-learn, XGBoost, PyTorch, TensorFlow, Transformers, LLMs

LLM Engineering: Ollama, LangChain, LangGraph, RAG

Backend & Deployment: FastAPI, REST APIs, Linux, Docker

Cloud & Databases: AWS, GCP, Azure, PostgreSQL, MySQL

CS Fundamentals: DSA, DBMS, Operating Systems

Education

Sage University Jun. 2024 – Jun. 2028

B.Tech. in Artificial Intelligence & Machine Learning | *CGPA: 7.57/10* *Indore, India*

Certifications

- **Python Programming with Red Hat (AD141-RHA), Ver. 9.0** Dec. 2025
- **PMR Certification – SAMTRIX** Dec. 2025
- **AWS Academy Graduate – Machine Learning Foundations** Dec. 2025

Achievements

- Participated in **VOID HACKS**, gaining hands-on experience in AI-driven problem-solving, teamwork, and software development. [LinkedIn Post]
